

HOME AUTOMATION
The heart of a smarter home.

Quick Start Guide for steps on how to create an automation or scene.

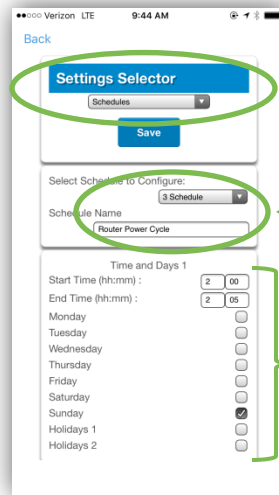

You can automate your system to do many things. This guide will walk you through setting up a schedule and turning a Z-Wave® device on / off based on that schedule. .

Create a Schedule & Automation to Turn On or Off a Z-Wave Devices at Specific Times

This example will walk you through the steps to power cycle your Wi-Fi® router. You can utilize the same steps for any schedule / device combination.

STEP 1

After logging into the site, select *Settings* from the hamburger menu on the top left. Select *Schedules* from the drop down menu in the *Settings* menu.

STEP 2

Select the next available schedule and name your schedule. Next, enter your start time, end time and which days you want the schedule implemented. Click Save and you have created your schedule.

STEP 3

Select *Automations (Scenes)* from the drop down menu in the Settings Selector. Choose the next available scene and name your automation.

STEP 4

Select the schedule you created above for "When Should Scene Work". Next, select the device you want to turn on or off, and for how long you want it to remain on / off. Click Save at the top, and your automation is created.
