CÔR™ THERMOSTAT USER'S GUIDE

APPLE® HOME KIT™

What is HomeKit?

Apple HomeKit technology provides an easy, secure way to control HomeKit-enabled accessories using Siri on your iPhone, iPad, or iPod touch. This integration will allow the ability to use Siri voice commands from an iPhone, iPad or iPod touch to adjust your Côr thermostat temperature settings.

Currently, you'll be able to do the following with your HomeKit-enabled Côr thermostat:

- Use Siri voice commands to control your thermostat,
- Set configurable scenes/automation for controlling multiple HomeKit accessories with a single Siri command,
- Set location-based scene/automation triggers to activate when arriving or leaving home (geofencing).

HomeKit-enabled Côr thermostats include new hardware in the unit that will allow you to pair your iOS devices with the new thermostat for HomeKit functionality. As a result, Apple HomeKit functionality and pairing is not available on previous Côr and thermostat models due to the new hardware.

For more information on HomeKit, please refer to Apple's website.

To learn more about HomeKit-enabled accessories, refer to this list of HomeKit-enabled accessories from Apple.

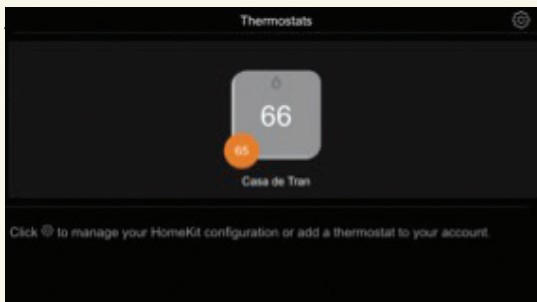

To learn more about setting up and using HomeKit-enabled accessories on your iPhone, iPad, or iPod Touch, please refer to Apple's support documentation.

Note: To use Siri voice commands, your Apple device must be on the same Wi-Fi network as your Côr thermostat unless you have an Apple HomeKit bridge (sold separately).

TO SET UP AND PAIR YOUR CÔR THERMOSTAT WITH HOMEKIT, JUST OPEN UP YOUR CÔR MOBILE APP AND FOLLOW THE INSTRUCTIONS BELOW:

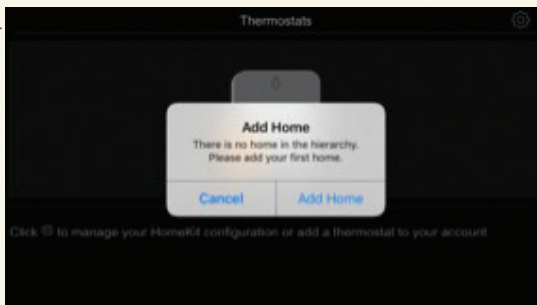

- 1 Tap on the **Settings** icon in the upper right corner of the startup screen

- 2 Tap on **Pair thermostat to HomeKit**.

- 3 Tap on **Add Home** if you don't have your Home set up.

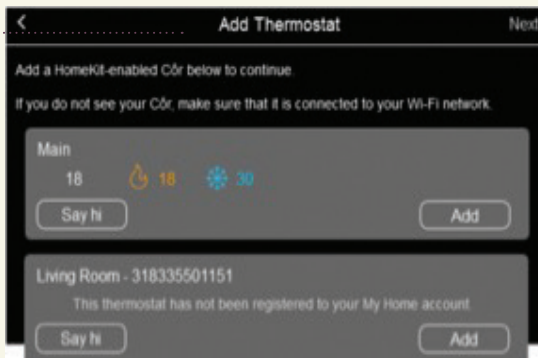

- 4 Enter the name of your Home and tap **Done**.

- 5 Tap on **Add**. Your **HomeKit code** should appear on your thermostat.

Note: Your iPhone must be connected to the same Wi-Fi network as the thermostat.

If you have more than one C r thermostat, tap **Say Hi** to make sure you're connecting to the right one.

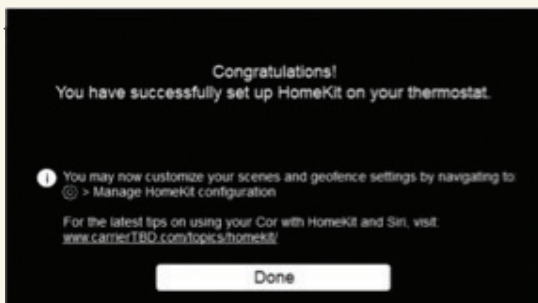

- 6 Point your iPhone camera at the thermostat. You will see **Paired with HomeKit** on your thermostat.

- 7 A default room will be created (you can change this later). Click **Next**.

- 8 **Success!** You'll see the 5 default commands you can start using! Click **Done**.

FREQUENTLY ASKED QUESTIONS

Where do I find my HomeKit registration code?

Your HomeKit registration code will appear on your thermostat once you pair your Côt thermostat with HomeKit.

What Siri voice commands can I use to control my HomeKit-enabled Côt thermostat?

If you're just starting out, here are a few to start with. Just Activate Siri by holding your iPhone home button for 3 seconds, and try one of the following:

1. *"What is my thermostat temperature"*
To get the temperature of your thermostat.
2. *"Set my thermostat to 20 degrees"*
To set your thermostat to 20 degrees.

The Côt thermostat is smart enough to know whether you have Celsius or Fahrenheit as your preferred temperature unit of measurement.
3. *"I'm leaving"*
To set your thermostat to Away comfort settings.

How do I know if my Côt thermostat is HomeKit-enabled?

Look for the label "Works with Apple HomeKit" on the product packaging.

Alternatively, you can go to the thermostat **Settings > Service > About my thermostat** and confirm the model number includes an "A" at the end.

HomeKit-enabled thermostats include the following model numbers:

TP-WEM01-A
T6-WEM01-A

What is the difference between Côt thermostat and HomeKit-enabled Côt thermostat?

- The only difference between the two products is that our HomeKit-enabled Côt thermostat supports Apple HomeKit technology. All other features are exactly the same.
- The product roadmap from a firmware and software perspective (not including HomeKit) remains the same for both existing Côt thermostat and HomeKit-enabled Côt thermostat.

What are the new features of the HomeKit-enabled Côt thermostat?

The new features of the HomeKit-enabled Côt thermostat are accessible through the iOS mobile app.

With the updated app you can:

- Use Siri voice commands to control your thermostat,
- Set configurable scenes for controlling multiple HomeKit accessories with a single Siri command,
- Set location-based scene triggers to activate scenes when arriving or leaving home.

Can I control a HomeKit-enabled Côt thermostat from an Android device?

- Yes, you can use both the Côt thermostat mobile app for iOS and Android to control a HomeKit-enabled Côt thermostat. You will have access to all Côt thermostat mobile app features and functionality.
- Please note that you will not be able to use any HomeKit functionality (such as Siri voice commands) on Android devices because Apple HomeKit technology is not compatible with Android.

FREQUENTLY ASKED QUESTIONS (con't)

My C r thermostat is not HomeKit-enabled. Can the thermostat be upgraded?

Due to the hardware changes required for Apple HomeKit certification, the previous model of the C r thermostat is not upgradeable to be HomeKit compatible. HomeKit compatibility is not something that can be made possible through a firmware upgrade, a software solution, or by utilizing a radio expansion slot on the C r thermostat.

However, both versions of the C r thermostat and HomeKit-enabled C r thermostat will be updated and supported equally.

What are the requirements for using HomeKit and Siri?

HomeKit requires a HomeKit-enabled C r thermostat and iOS 10 or later on your iPhone, iPad, or iPod Touch. To use Siri when away from home, you will need an Apple TV (3rd generation or later) with Apple TV software 7.0 or later

I have AppleTV installed but Siri isn't working away from home

To control a HomeKit-enabled accessory (including HomeKit-enabled C r thermostat) away from home, you will need an Apple TV (3rd generation or later) with software version 7.0 or later. If remote access is not working, please make sure you are signed into the same iCloud account on your iOS device and Apple TV. If you continue to have issues, try signing out of iCloud on your Apple TV, then sign back in.

**For more information on HomeKit™, please refer to Apple's website.
To learn more about setting up and using HomeKit-enabled accessories on your
iPhone, iPad, or iPod Touch, please refer to Apple's support documentation.**
