**Carrier Transicold**, the global experts in electronics repair service.
A WORLD OF DIFFERENCE

More Quality.
Just like new. That’s the Carrier Transicold repair difference, with all hardware and software brought up to OEM specifications and backed by the same warranty that comes with the original purchase. Unlike a typical third-party repair facility, Carrier also conducts a comprehensive diagnostic test of all components. With our unique diagnostic process, we suggest replacement of any components that, based on repair histories, are potential problem areas, even though current performance may be adequate.

More Training.
Carrier Transicold’s growing team of repair technicians worldwide consists of the most talented electronics engineers in the industry. They receive ongoing state-of-the-art training into the diagnostics and repair of both Carrier and competitive controllers, which are also serviced by Carrier.

More Locations.
Carrier Transicold’s Performance Parts Group delivers world-class electronics parts and repair service through an outstanding global network. Strategically located parts depots and repair centers provide consistent quality, service, pricing and warranty coverage, wherever you go worldwide.

More Choices.
Turn to the experts for our wide range of genuine Carrier Transicold repair parts for “good as the original” quality in any application. Just look for the Carrier seal – your symbol of confidence.

Carrier Transicold offers global access to expert electronics service and quality Select Line™ parts.
