Carrier Corp. Introduces New Series of WeatherMaker[®] Rooftop Units with Puron[®]

(MONTERREY, Mexico – April 14, 2008) – Carrier Corp., the world leader in heating, ventilation, air conditioning and refrigeration (HVACR), has introduced a new series of 20-60 ton WeatherMaker large rooftop (LRT) air conditioning units. The new WeatherMaker LRT series uses Puron refrigerant and exceeds ASHRAE 90.1-2007 efficiency requirements.

The WeatherMaker rooftop series represents significant improvements in both efficiency and replacement compatibility. Utilizing Carrier's Novation[™] heat exchanger technology, the rooftop units provide increased corrosion protection while lessening the amount of refrigerant required, thereby minimizing maintenance and operational costs.

Designed as a direct replacement for thousands of existing hydrochlorofluorocarbon (HCFC)-based legacy rooftop air conditioners, the new WeatherMaker series is available in eight sizes and multiple configurations – cooling, cooling with gas heating, and cooling with electric heat.

Carrier

A United Technologies Company

The WeatherMaker LRT series is available in vertical or horizontal discharge arrangements and constant or variable air volume, which allows the units to be customized for a variety of applications.

Joe Chirco, product business unit manager, commercial airside products, Carrier Building Systems and Services, said, “Our newest WeatherMaker LRT series offers an environmentally sound and energy-efficient solution for our customers to incorporate into all Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ projects.”

For more information on the WeatherMaker series and the full line of quality Carrier products, visit www.carrier.com.

About Carrier Corp.

Carrier Corp., headquartered in Farmington, Conn., is the world’s largest provider of heating, air-conditioning and refrigeration solutions. With 2007 revenues of \$14.6 billion, Carrier has approximately 43,000 employees worldwide and operations in more than 170 countries. Carrier is part of United Technologies Corp., a Hartford, Connecticut-based provider of products and services to the aerospace and building systems industries worldwide.
