## **Carrier Corp. Adds Special Seismic-Compliant Package to WeatherMaker® Packaged Rooftops**

SYRACUSE, N.Y., May 16, 2011 — Responding to customer needs, Carrier has expanded the availability of their special seismic-compliant package to include the [WeatherMaker®](#) 3 to 25 ton rooftop models. This optional package ensures that select Carrier equipment meets the requirements for seismic events in accordance with the California Office of Statewide Health and Planning Development (OSHPD). The special seismic-compliant package option is also available on Carrier® [AquaSnap® 30RB](#) air-cooled chiller, [Evergreen® 23XRV and 19XRV](#) water-cooled chillers, [AquaForce® 30XW](#) water-cooled chiller, and Centurion® rooftops. Carrier Corp., a unit of United Technologies Corp. (NYSE:UTX), is the world's leader in high technology heating, air-conditioning and refrigeration solutions, improving the world around us through engineered innovation and environmental stewardship.

“More and more building owners and engineers must comply with special seismic requirements for equipment as well as for the building itself,” stated Greg Alcorn, vice president, commercial sales and marketing, Carrier Residential and Commercial Systems. “With our special seismic certification package, they can be assured that our equipment has been validated by an independent third party, and therefore does not require additional testing at the jobsite.”

John Mix, product manager, light commercial rooftops, Carrier Residential and Commercial Systems added, “The special seismic-compliant package on the WeatherMaker rooftop line is one more innovative option that we offer to improve performance and reliability. Our WeatherMaker rooftops meet virtually any light commercial application need, making them the perfect solution for energy retrofits, upgrades or new installations.”

Carrier equipment with the optional, installed seismic package meets current International Building Code, California Building Code and ASCE 7 seismic qualification requirements in concurrence with ICC ES AC156 Acceptance Criteria for Seismic Qualification by Shake Table Testing of Nonstructural Components and Systems.

For further information and documentation on Carrier seismic compliant products go to [www.carrier.com](http://www.carrier.com).
