NOTE TO EQUIPMENT OWNER:
Please read this Owner’s Information Manual carefully before installing and using this appliance and keep this manual for future reference.

For your convenience, please record the model and serial numbers of your new equipment in the spaces provided. This information, along with the installation data and dealer contact information, will be helpful should your system require maintenance or service.

**A NOTE ABOUT SAFETY**

Any time you see this symbol in manuals, instructions and on the unit, be aware of the potential for personal injury. There are three levels of precaution:

- **DANGER** identifies the most serious hazards which will result in severe personal injury or death.
- **WARNING** signifies hazards that could result in personal injury or death.
- **CAUTION** is used to identify unsafe practices which could result in minor personal injury or product and property damage.
- **NOTE** is used to highlight suggestions which will result in enhanced installation, reliability, or operation.

---

### WARNING

**PERSONAL INJURY, DEATH AND / OR PROPERTY DAMAGE HAZARD**

Failure to follow this warning could result in personal injury, death or property damage.

Improper installation, adjustment, alteration, service, maintenance, or use can cause explosion, fire, electrical shock, or other conditions which may cause personal injury or property damage. Consult a qualified installer, service agency, or your distributor or branch for information or assistance. The qualified installer or service agency must use factory-authorized kits or accessories when modifying this product.

Read and follow all instructions and warnings, including labels shipped with or attached to unit before operating your new air conditioner.

---

**GENERAL**

The ducted fan coil unit provides quiet, maximum comfort. In addition to cooling and/or heating, the ducted fan coil unit matched with an outdoor condensing unit filters and dehumidifies the air in the room to provide maximum comfort.

**IMPORTANT**: The ducted fan coil unit should be installed by authorized personnel only; using approved tubing and accessories. If technical assistance, service or repair is needed, contact the installer.

The ducted fan coil unit can be set up and operated from the remote control (provided). **If the remote is misplaced, the system can be operated from the “Auto” setting on the unit.**

**Operating Modes:**

The ducted fan coil unit has five operating modes:

- Fan only
- Auto
- Heating (heat pump models only)
- Cooling
- Dehumidification (DRY)

**Fan Only**

In **Fan Only** mode, the system filters and circulates the room air without changing room air temperature.

**Auto**

In **Auto** mode, the system automatically cools or heats the room according to the user-selected set point.

**Heating**

In **Heating** mode, the system heats and filters the room air.

**Cooling**

In **Cooling** mode, the system cools, dries and filters the room air.

**Dehumidification (DRY)**

In **Dehumidification** mode, the system dries, filters and slightly cools the room air temperature. This mode prioritizes air dehumidification but it does not take the place of a dehumidifier.

**Wireless Remote Control**

The remote control transmits commands to set up and operate the system. The control has a window display panel that displays the current system status. The control can be secured to a surface when used with the mounting bracket provided.

**Wired Remote Control (Optional)**
Fig. 1 - Indoor/Outdoor Unit

**INDOOR UNIT**

1. Air outlet
2. Air Inlet
3. Air filter
4. Electric control cabinet
5. Wired controller
6. Drain pipe

**OUTDOOR UNIT**

7. Connecting pipe
8. Air inlet
9. Air inlet (side and rear)
10. Air outlet
11. Wireless Remote Controller
DISPLAY PANELS

Fig. 2 - IR Receiver Display Panel

Fig. 3 - Remote Controller
Wireless Remote Display

Mode display
Displays the current operation mode. Including auto( ), cool( ), dry( ), heat( ) (Not applicable to cooling only models), fan( ) and back to auto( ).

Transmission Indicator
This transmission indicator lights when remote controller transmits signals to the indoor unit.

ON/OFF display
Displayed by pressing the ON/OFF button. Press the ON/OFF button again to remove.

TIMER ON display
Displayed when TIMER ON time is set.

TIMER OFF display
Displayed when TIMER OFF time is set.

Sleep Display
Displayed under sleeping operation. Press the SLEEP button again to remove.

FOLLOW ME Display (on some models)
Displayed when FOLLOW ME function is activated.

Temp./Timer display
Displays the temperature setting(62 F~86 F). When you set the operating mode to FAN, no temperature setting is displayed. And in the TIMER mode, shows the ON and OFF settings of the TIMER.

Fan speed display
Displays the selected fan speed, AUTO(no display) and three fan speed levels "LOW" "MED" "HIGH" can be indicated. The fan speed is AUTO when the operating mode is either AUTO or DRY.

Note:
All indicators shown in the figure are for the purpose of clear presentation. But during the actual operation only the relative functional signs are shown on the display window.

Fig. 4 - Unit Display
REMOTE CONTROL

![CAUTION]

EQUIPMENT DAMAGE HAZARD
Failure to follow this caution may result in equipment damage.
Handle the control with care and avoid getting the control wet.

IMPORTANT: The wireless remote control can operate the unit from a distance of up to 25 ft. (7.6 m) as long as there are no obstructions.

NOTE: If a Wireless Remote controller is used, relocate the IR Receiver within line of sight of the remote location using the 6 ft. cable included. The factory location of the IR receiver is inside the control box.

When the timer function is used, the remote control should be kept in the vicinity of the fan coil (within 25 ft. / 7.6 m).
The remote control can perform the following basic functions:
- Turn the system ON and OFF
- Select the operating mode
- Adjust the room air temperature set point and fan speed
Refer to the Remote Control Function section for a detailed description of all the remote control’s capabilities.

Battery Installation

Two AAA 1.5v alkaline batteries (included) are required to operate the remote control.
To install or replace batteries:
1. Slide the back cover off the control to open the battery compartment.
2. Insert the batteries. Follow the polarity markings inside the battery compartment.
3. Replace the battery compartment cover.

NOTE:
1. When replacing batteries, do not use old batteries or a different type battery. This may cause the remote control to malfunction.
2. If the remote is not going to be used for several weeks, remove the batteries. Otherwise battery leakage may damage the remote control.
3. The average battery life under normal use is about 6 months.
4. Replace the batteries when there is no audible beep from the indoor unit or if the Transmission Indicator fails to light.
5. When batteries are removed, the remote control erases all programmed settings. The control must be reprogrammed after insertion of new batteries.

Remote Control Operation - Quick Start

NOTE: When transmitting a command from the remote control to the unit, be sure to point the control toward the right side of the unit. The unit confirms receipt of a command by sounding an audible beep.

1. Turn the unit on by pushing the ON/OFF button.
2. If there is a preference for °C rather than °F (default), press and hold the increase and decrease temperature set point buttons together for approximately 3 seconds.
3. Select the desired mode by pressing MODE.

![Fig. 5 - Modes]

4. Select the temperature set point by pointing the control toward the unit and pressing the increase/decrease temperature set point buttons until the desired temperature appears on screen.
5. Select the desired fan speed by pressing FAN.

NOTE: If the unit is operating in DRY or AUTO mode, the fan speed will be automatically set.

Manual Operation

If the remote control is lost, damaged, or the batteries are exhausted, the MANUAL button located on the IR Receiver can be used to run the unit.
When MANUAL is pressed once, the AUTO mode takes affect (heat or cool). When this button is pressed twice, the system enters the TEST mode and runs for 30 minutes in the COOLING mode (it will run in the AUTO mode afterward). When pressed three times, the system turns off.

![Fig. 6 - IR Receiver Display Panel]

The set conditions of manual operation are as follows:
- Preset set point: 76°F (24°C)
- Fan speed: AUTO
REMOTE CONTROL FUNCTIONS

Pressing the On/Off Button
When the air conditioner is not in operation, the remote control displays the last set point and mode.

- Press ON/OFF to start the unit.
  - The unit starts in the last operating mode and set point. The ON/OFF indicator appears.
- Press ON/OFF to stop the unit.
  - All the indicator lights on the unit go out, and the remote control displays the set point and mode.

NOTE: If ON/OFF is pressed too soon after a stop, the compressor will not start for 3 to 4 minutes due to the inherent protection against frequent compressor cycling. The unit only emits an audible beep when the signals are received correctly.

Selecting an Operating Mode
Use OPERATING MODE to select one of the available modes.

Selecting the Room Temperature Set Point
Press the increase temperature set point button and decrease button to raise or lower the temperature.

The unit confirms the signal receipt with a beep and the value of the set temperature appears on the display and changes accordingly. The temperature can be set between 62°F (17°C) and 86°F (30°C) in increments of 1°F or 1°C.

NOTE: In the COOLING mode, if the temperature selected is higher than the room temperature, the unit will not start. The same applies for the HEATING mode if the selected temperature is lower than the room temperature.

Selecting the Fan Speed

The fan speed can be selected by pressing the FAN button.

NOTE: When the unit is on, the fan runs continuously in cooling or heating. When in heating, there might be situations where the fan will slow down or shut off to prevent cold blow.

DIRECT
NOTE: The DIRECT feature is not available on this model.

SWING
NOTE: The SWING feature is not available on this model.

Timer Function
TIMER ON (to start the unit) and TIMER OFF (to stop the unit) can be used separately or together.

Timer ON only
This function allows the unit to start automatically at the set time. The TIMER ON can be set while the unit is on or off.

UNIT ON

- Press TIMER ON to initiate the auto-on time sequence. The set time is displayed in the remote control display. Every time TIMER ON is pressed, the time increases by 30 minutes, up to 10 h. It increases by 60 minutes, afterwards, until the time setting reaches 24 h.
- When TIMER ON is set, the unit’s TIMER light illuminates. The unit continues to run at the set time.

UNIT OFF

- Set the timer described in the UNIT ON section.
- The unit starts at the set time.

Adjust the TIMER ON settings to 0.0 to cancel this option.

Timer OFF only
This function allows the unit to stop automatically at the set time. The timer can be set while the unit is on or while it is off.

UNIT ON

- Press TIMER OFF to initiate the auto-off time sequence. The set time appears on the remote control display. Every time TIMER OFF is pressed, the time increases by 30 minutes, up to 10 h. It increases by 60 minutes, afterwards, until the time settings reach 24 h.
- When TIMER OFF is set, the timer light on the unit illuminates and the unit turns off automatically at the set time.
UNIT OFF

a. Set the TIMER OFF as described in the UNIT ON section. The TIMER display on the unit illuminates and the unit remains off.

b. Adjust the TIMER ON settings to 0.0 to cancel this option.

Timer ON and Timer OFF

Use both functions to program the unit to turn on and shut off at specified times.

UNIT OFF

a. Set TIMER ON as previously described.

b. Set TIMER OFF as previously described. The unit starts automatically at the set TIME ON and turns off at the set TIME OFF.

UNIT ON

a. Set TIME OFF as previously described.

b. Set TIME ON as previously described. The unit turns off automatically at the set TIME OFF and turns on at the set TIME ON.

Sleep Mode

SLEEP mode is used to conserve energy and can be used when the unit is in the COOL, HEAT or AUTO mode only.

Cool Mode

a. Push the SLEEP button. After 1 hour the set point raises by 1.8°F (1°C). After another hour, the set point raises by another 1.8°F (1°C) and the fan runs in a low speed. The unit shuts off 5 hours after setting the SLEEP mode. The SLEEP mode cancels if either the “Mode”, “TEMP”, “Fan”, “Timer”, or “On/Off” buttons on the remote control is pressed.

Heat Mode

Same as cooling mode however set points are lowered by 1.8°F (1°C).

Turbo Mode

Use the TURBO mode to cool or heat the room rapidly.

a. Press TURBO. An audible “beep” is heard if the indoor unit supports this function. The fan runs on super high speed. The TURBO mode terminates automatically 20 minutes after pushing TURBO. It can be terminated immediately by selecting TURBO again. When the TURBO mode is terminated, the unit reverts to the original setting.

Self Clean Mode (Available only on sizes 9 to 24)

Press the “Self Clean” button to activate or deactivate the self-cleaning function. Under this function, the air conditioner automatically cleans and dries the evaporator. The cleaning cycle takes 30 minutes, after which the unit turns off automatically. Pressing the “Self Clean” button on the middle of the cycle cancels the operation and turn off the unit. This function can be activated only on COOL or DRY mode.

Follow Me Mode

Press Follow Me to activate or deactivate this function. Under this setting, the temperature that appears in the remote control is the actual temperature at its location. The remote control sends this signal to the air conditioner every 3 minutes. This function is not available for DRY and FAN modes.

Freeze Protection Mode

Press FP for approximately 2 seconds to activate or deactivate the freeze protection mode (heating set back). The indoor unit displays “FP”.

NOTE: This function is only available in the heating mode.

Under this function, the unit operates at high fan speed and the coil temperature automatically sets to 46°F (8°C). This mode can also be deactivated by pressing the “On/Off”, “Sleep”, “Mode”, “Fan”, or either “TEMP” buttons.

Silence Mode

NOTE: The Silence Mode (SLC Button) feature is not available on this model.

LED Light

Press the LED button to turn the display light on and off.

Resetting the Remote Control

If the batteries in the remote control are removed, the current settings will be cancelled and the control returns to the initial settings and will be in standby mode. Push ON/OFF to activate it.

Time Delay

If ON/OFF is pressed too soon after a stop, the compressor will not start for 3 to 4 minutes due to the inherent protection against frequent compressor cycling. The unit only emits an audible beep when the signals are received correctly.

Heating Features

If the unit is in the heating mode, there is a delay when the fan starts. The fan starts only after the coil is warmed up to prevent cold blow.

Auto Defrost Operation

In HEATING mode, if the outdoor coil is frosted, the indoor fan and outdoor fan turns off while the system removes the frost from the outdoor coil. The system automatically reverts to normal operation when frost is removed from the outdoor unit.

Auto Start

If the power fails while the unit is operating, the unit stores the operating condition, and the unit will start operation automatically under those conditions when the power is restored.
CLEANING, MAINTENANCE AND TROUBLESHOOTING

**CAUTION**

**ELECTRICAL SHOCK HAZARD**
Failure to follow this caution may result in personal injury or death.
Always turn off power to the system before performing any cleaning or maintenance to the system. Turn off the outdoor disconnect switch located near outdoor unit. Be sure to disconnect indoor unit if on a separate switch.

**CAUTION**

**EQUIPMENT DAMAGE/OPERATION HAZARD**
Failure to follow this caution may result in equipment damage or improper unit operation.
Operating the system with dirty air filters may damage the indoor unit and could cause reduced cooling performance, intermittent system operation, frost build-up on indoor coil or blown fuses.

**Periodic Maintenance**
Periodic maintenance is recommended to ensure proper operation of the unit. Recommended maintenance intervals may vary depending on the installation environment, e.g., dusty zones, etc. Refer to Table 1.

**CAUTION**

**CUT HAZARD**
Failure to follow this caution may result in personal injury.
The coil fins are very sharp. Use caution when cleaning. Always wear safety protection.

**Cleaning the Coil**
Clean the coil at the beginning of each cooling season, or when necessary. Use a vacuum cleaner or a long-bristle brush to avoid damage to the coil fins.

**Air Filters**
Remove and clean the air filters once a month.

**NOTE:** If the air filters show signs of excessive wear or are torn, they must be replaced. Contact your local dealer for replacement filters.

1. Unscrew filters from the frame.
2. Pull filters down to remove.
3. Vacuum filters.
4. Clean with warm water.
5. Shake filter to remove excess water and dry thoroughly.
6. Replace filter by sliding into rack until filter snaps in place.
7. Close front panel on unit.

**CAUTION**

**EQUIPMENT DAMAGE HAZARD**
Failure to follow this caution may result in equipment damage.
When cleaning the front panel, do not use water hotter than 105°F (40.6°C) and do not pour water onto the fan coil. Do not use abrasive or petroleum based cleaners as they may damage the front panel.

**Preparing for Extended Shutdown Period**
Clean the filters and place them back into the unit. Operate the unit in FAN ONLY mode for 12 hours to dry all internal parts. Turn the main power supply off and remove the batteries from the remote control.

**System Operation Recommendations**
The items outlined in the following list help to assure proper system operation:
- Replace both remote control batteries at the same time.
- Point the remote control toward the unit display panel when transmitting a command.
- Keep doors and windows closed while unit is operating.
- Contact an authorized service representative if a problem arises that cannot be easily resolved.
- Do not perform cleaning or maintenance activities while the unit is on.
- Keep the display panel on the unit away from direct sunlight and heat as this may interfere with remote control transmissions.
- Do not block air intakes and outlets on the indoor or outdoor units.

**Energy Saving Recommendations**
The following recommendations will add greater efficiency to the ductless system:
Select a comfortable thermostat setting and leave it at chosen setting. Avoid continually raising and lowering the setting.

Keep the filter clean. Frequent cleaning may be necessary depending on indoor air quality.

Use drapes, curtains or shades to keep direct sunlight from heating the room on very hot days.

Limit the unit’s run time by using the TIMER function.

Do not obstruct the air intake on the front panel.

Turn on the air conditioning unit before the indoor air becomes too uncomfortable.

---

**Troubleshooting**

Refer to Table 2 before contacting your local dealer.
