

Expandable Media Filter

Model EZ Flex™

Cool Comfort, Bryant Reliability.

A History of Easy Solutions

Bryant's history of delivering simple, high-value home comfort solutions goes back more than a century to 1904. Through the commitment and dedication of our product development and manufacturing teams, we have consistently met every new challenge head-on and delivered the products to meet or exceed expectations. Today, as consumers spend more time inside and indoor air filtration is more important than ever, Bryant offers a high-value solution - the EZ Flex™ expandable media filter.

The Perfect Fit

Designed by a company that also manufactures heating and cooling products, the EZ Flex™ expandable media filter efficiently traps unwanted airborne particles while allowing free flow of cleaner air to maintain your system's energy efficiency. Because it helps keep your system's components cleaner, you can expect less wear and tear for longer life. Best of all, it's offered to you by Bryant, the world's most trusted name in home comfort products.

Efficient Indoor Air Filtration

Your home is where you go to relax. However, pollen and mold spores can enter through open doors and windows, bacteria and viruses can spread between family and friends, fine dust particles get kicked up from floors and furniture, and dander and hair fall from pets. Bryant's EZ

Flex™ expandable media filter helps clear the air by trapping many of these particles and preventing them from re-entering your living areas. It's an efficient and economical way to protect your home furnishings, allow your system to run more efficiently, and enjoy cleaner indoor air.

Performance

Home Comfort Components

Companies that focus on filtration don't always take into account the need to maintain airflow through your system. Bryant designs and manufactures entire home comfort systems, so you can be confident that the EZ Flex™ expandable media filter will easily integrate into your Bryant system.

The EZ Flex™ expandable media filter is a perfect fit for Bryant systems, new and old. In addition, it's designed to fit many of our competitors' cabinets so you can upgrade to Bryant.
